Nathaniel Price

335 S. 46th St. Lincon, NE 68510
natbprice DayduhScientist +1 904 315 2486 natbprice@gmail.com natbprice

Education

2016	**Joint Ph.D. Mechanical Engineering** Gainesville, Florida, US and Saint-Étienne, Rhône-Alps, France	University of Florida École des Mines de Saint-Étienne
2014	**Graduate Certificate in Scientific Computing** Gainesville, Florida, US	University of Florida
2014	**M.S. Mechanical Engineering** Gainesville, Florida, US	University of Florida
2012	**B.S. Mechanical Engineering** Gainesville, Florida, US	University of Florida

Select Projects

Project 1: Web-based data analysis application — Nebraska Game and Parks Commission

Employer(s): University of Nebraska-Lincoln
Language(s): SQL, R
Skills: exploratory data analysis, interactive visualization

- Developed and deployed application for exploratory data analysis of SQL customer database
- Advanced data filters, interactive graphics, customize and export plots, download data summaries

Project 2: Buying behavior of Nebraska anglers — Nebraska Game and Parks Commission

Employer(s): University of Nebraska-Lincoln
Language(s): SQL, R
Skills: simulation-based model checking, maximum likelihood estimation

- Developed novel statistical method for analyzing repeat-purchase data
- Applied method to predict purchasing behavior of 1.2 million anglers with individual-level granularity

Project 3: Optimal sounding rocket design under uncertainty — ONERA – The French Aerospace Lab

Employer(s): University of Florida, ONERA
Language(s): Matlab
Skills: optimization, machine learning (e.g., Gaussian process), Monte Carlo simulation

- Developed method to tradeoff between expected design performance and risk of future redesign while achieving target reliability
- Applied method to conceptual design of a sounding rocket to reduce gross lift off weight while achieving target altitude

Project 4: Effects of patient variability on safety of a medical implant — Biomet

Employer(s): University of Florida
Language(s): Python
Skills: finite element analysis

- Created model predicting sternum displacement given patient variability (e.g., bone strength) and implant design (e.g, screw length)
- Awarded Biomedical Engineering Society Design and Research Award and Knox T. Millsaps Outstanding Undergraduate Paper Award

Employers

2016 - present	Post-doctoral Research Associate, University of Nebraska-Lincoln, Lincoln, Nebraska, US
2014 - 2016	Ph.D. Student Researcher, ONERA, Palaiseau, Île-de-France, France
2012 - 2016	Graduate Research Assistant, University of Florida, Gainesville, Florida, US
2011 - 2012	Undergraduate Research Assistant, University of Florida, Gainesville, Florida, US
2010 - 2011	Launch Engineer Intern, SpaceX, Cape Canveral, Florida, US
2009 - 2010	Undergraduate Research Assistant, University of Florida, Gainesville, Florida, US
2005 - 2010	Engineer Intern, E&S Consulting, Inc., St. Augustine, Florida, US
